A Drug-Free Approach to Healthcare represents the culmination of decades of researching the research and clinical trials, conducted by some of the most brilliant and dedicated doctors and scientists in the entire world. Many very effective and extremely valuable natural therapies have been deliberately suppressed from the public, due to their lack of profitability. You will now have access to a surprising amount of little known yet potentially life-saving and disease-preventing therapies that few in the nation (including their doctor) are aware of, and explained in simple terms you can easily understand. Dr. Tanton will take you on an amazing eye-opening journey that can potentially have a major influence on both your future health, and lifespan. You will learn exactly why taking medications is extremely risky and seldom necessary. Mary Lou for instance went from "nine medications to none" in only 60 days, and discovered that withdrawal was surprisingly easy. She also began losing weight, and claims she hadn't felt as good in years, (she obviously didn't need any of her medications), including her 16-year dependency on Prozac(tm). Then Duane, (in spite of his doctor's warnings), went from eight medications to one in only 30 days, and never felt better.
